

WEEK OF MAY 26, 2026

Market Navigator

U.S. markets rallied as oil prices declined 8 percent amid hopes for a settlement to end the war in the Middle East. The Dow Jones Industrial Average and the Russell 2000 Index each rose more than 2 percent. Yields on the 10-year Treasury bond moved marginally lower, closing at 4.56 percent.

Quick Hits

1. **Beyond the headlines:** What is the Federal Reserve (Fed) likely to do next?
2. **Report releases:** Minutes from the Fed's April meeting showed division on interest rate policy.
3. **Financial market data:** Stocks rallied across the board; the Dow Jones and the Russell 2000 each rose more than 2 percent.
4. **Looking ahead:** Consumer confidence and spending take center stage this week.

Beyond the Headlines: What Is the Fed Likely to Do Next?

When setting interest rate policy, the Fed follows its dual mandate: maximum employment and stable prices. Those metrics are moving in opposite directions. Job creation, though not robust, has been positive after several negative months. Conversely, inflation has accelerated because of tariffs and surging oil prices.

This divergence has led to division among Federal Open Market Committee (FOMC) members. There is now a small chance that the central bank will raise rates before the end of the year. The real questions facing investors are: what would cause that to happen, and what would it mean for portfolios?

Status Quo—for Now

The FOMC, which has eight meetings each year, next gathers in mid-June and late July. It's unlikely the Fed will act on interest rates this summer. With the economy continuing to expand—thanks to the magnitude of the artificial intelligence infrastructure build-out and growing employment—the central bank doesn't need to stimulate the economy. This gives the Fed the ability to remain data-dependent and wait to see how inflation unfolds and how that affects hiring and growth.

Inflation Is the Key

The path of accelerating inflation hinges on the Strait of Hormuz. With a potential agreement to end the war and open the strait—which would return much-needed oil supply to the global economy—inflation could trend lower through the end of the year. It's hard to envision the Fed raising rates if it believed inflation would move closer to its 2 percent target.

With any settlement, however, the details are critical. There are two key questions:

- Will the strait reopen completely, without restrictions?
- How long will it take to return to shipping levels from January and February?

The answers will determine whether the increase in inflation is temporary or whether it will have a lasting effect on consumer spending and the economy.

What Does It Mean for Portfolios?

The most likely path for Fed interest rate policy is a slow, cautious move lower over the next couple of years. But this depends heavily on inflation. In other words, small cuts are possible, but patience remains the dominant theme for policy changes.

Although interest rates are unlikely to return to levels seen after the 2008 financial crisis and the Covid-19 pandemic, it isn't necessarily bad news for investors. For savers and retirees, cash yields remain attractive and won't drop quickly. Historically, stocks have benefited from stable or slightly lower rates. For bond investors, gradual cuts should provide a tailwind but still allow for opportunities to add attractive intermediate-term yields to portfolios.

In other words, the current environment should be supportive over the long term for markets.

The most likely path for Fed interest rate policy is a slow, cautious move lower over the next couple of years. But this depends heavily on inflation.

Report Releases: May 18–22, 2026

National Association of Home Builders Housing Market Index May (Monday)

Home builder sentiment improved modestly after falling sharply in April. Despite the improvement, the index remained in contractionary territory.

- Expected/prior month sentiment: 34/34
- Actual month sentiment: 37

FOMC Meeting Minutes April (Wednesday)

Minutes from the April FOMC meeting suggested a divided central bank. In the post-meeting statement, some members advocated removing language that indicated an easing bias, while others successfully pushed to keep it.

Housing Starts and Building Permits April (Thursday)

These two measures of new home construction were mixed in April. Housing starts fell after surging in March, while building permits rebounded following a steep decline the previous month.

- Expected housing starts/prior housing starts: -5.3%/+12.0%
- Actual housing starts: -2.8%
- Expected building permits/prior building permits: 2.5%/-11.5%
- Actual building permits: +5.8%

>> The Takeaway

- Housing market updates remained mixed.
- FOMC meeting minutes showed that the Fed is divided on the path forward for interest rates due to the recent surge in oil prices and accelerating inflation.

Financial Market Data

Equity

U.S. markets were higher but leadership shifted. The Dow Jones and Russell 2000 each rose more than 2 percent, and the Nasdaq Composite and S&P 500 were each up nearly 1 percent. The catalyst was an 8 percent drop in oil prices because of favorable headlines about a potential deal to end the Middle East war. Health care, utilities, and real estate each rose more than 3 percent. Communication services and consumer staples lagged. International equities also rallied; developed markets rose more than 3 percent.

Index	Week-to-Date	Month-to-Date	Year-to-Date	12-Month
S&P 500	0.91%	3.77%	9.67%	29.46%
Nasdaq Composite	0.48%	5.90%	13.62%	40.09%
DJIA	2.18%	2.01%	5.89%	22.89%
MSCI EAFE	3.45%	3.47%	10.11%	24.98%
MSCI Emerging Markets	2.95%	7.12%	22.77%	49.80%
Russell 2000	2.75%	2.55%	16.21%	42.20%

Source: Bloomberg, as of May 22, 2026

Fixed Income

Fixed income markets were mostly higher. Continued commentary regarding a potential deal to end the war in the Middle East calmed markets. The yield on the 10-year Treasury halted its steep rise, closing at 4.56 percent. This closing yield was down 4 basis points (bps) compared with the previous week. High-yield bonds also moved higher, while the municipal market was flat.

Index	Week-to-Date	Month-to-Date	Year-to-Date	12-Month
U.S. Broad Market	0.27%	-0.52%	-0.45%	5.18%
U.S. Treasury	0.18%	-0.66%	-0.78%	3.70%
U.S. Mortgages	0.42%	-0.53%	-0.06%	6.93%
Municipal Bond	-0.28%	-0.65%	0.31%	5.88%

Source: Bloomberg, as of May 22, 2026

>> The Takeaway

- Stocks, led by the Dow Jones and the Russell 2000, continued higher. Health care, utilities, and real estate each rose more than 3 percent.
- Fixed income markets were mostly higher. Commentary about a potential deal in the Middle East led Treasury yields to move lower.

Looking Ahead

Consumers will be the focus of economic reports this week. The Conference Board Consumer Confidence Index and personal income and spending data will give investors insight into how consumers are navigating higher energy prices.

- The week kicks off on Tuesday with the **Conference Board Consumer Confidence Index** for May. It's expected that confidence will fall after improving modestly in April.
- On Wednesday, we'll see a report on **personal income and spending** for April. Both are expected to increase, with personal income rebounding after falling in March.
- **Earnings reports** continue; highlights include Costco and Dell.
